

ZP-600 ADDITIVE 'AUTOMATIC TRANSMISSION TREATMENT'

WHAT TO EXPECT:

- ◆ Formulated to combine with the contents of all automatic transmission fluids and power steering
- ◆ The ZP-600 is a powerful and concentrated metal processing for hydraulic systems
- ◆ Provides sub-surface lubrication within the grain of the metal which adds solid lubrication to the metals
- ◆ Works with all automatic transmissions, gear components or systems with friction discs or 'wet clutches' in oil sump
- ◆ Increases the life of the transmission or component by reducing the generation of wear particles and varnish buildup. It prevents fluid leaks and stops slipping
- ◆ This ATF conditioner extends the service life of components and oil
- ◆ This oil additive allows for smooth and progressive gearshifts, it softens 'by blow' during gear changes
- ◆ ZP-600 is an ideal treatment for 'lazy' transmission. Must not have any breakage or internal leakage. A transmission that is in this condition will promptly regain the gear changes without hesitation
- ◆ It quickly cleans, dissolves and disperses varnish, rust and gums and reduces oil oxidation
- ◆ Contains a wet and dry dielectric anti-wear lubricant that reduces friction
- ◆ Revitalize the seals and helps prevent leakage
- ◆ The additive for ATF ZP-600 lowers the operating temperature, which extends the life of the oil and provides increased load capacity of the system
- ◆ ZP-600 Automatic Transmission Additive Treatment allows an automatic transmission to function smoothly and in a positive action, the way it was designed

DIRECTIONS: FOR ALL AUTOMATIC TRANSMISSIONS

- ◆ The ZP-600 additive has been specially formulated for automatic transmissions or 'Power Shift'. It is recommended for hydraulic or hydrostatic systems, as well as for all other components with friction disks or 'wet clutches' in oil sump
- ◆ Add ZP-600 to the nominal part ratio of 1 part of ZP-600 for 20 part of oil (1:20) or 50ml (1.7oz) per 1 liter (35oz) of quality oil
 - ◆ Advanced age-old transmissions with considerable varnish build-up may require additional treatment for transmission to regain flexibility in shifting

ZP-600 ADDITIVE 'AUTOMATIC TRANSMISSION TREATMENT'

APPLICATIONS:

- ◆ AUTOMOBILE, PICK UP, RV'S, ETC.

- ◆ BUS, TRUCKS FOR; CITY DELIVERY, HIGHWAY TRANSPORTATION, BULK CARRIER, ETC.

- ◆ MACHINERY; LOADER, EXCAVATOR, GRADER, TRACTOR, ASPHALT SPREADER, HARVESTER, ETC.

- ◆ INDUSTRIAL GENERATOR, COMPRESSOR, ETC.

- ◆ MARINE VEHICLES; BOAT, CRUISER, FISHING BOAT, FREIGHT SHIP, FERRY, ETC.

- ◆ OTHER TYPES OF EQUIPMENT; MUD PUMPS, PLANETARY DRIVE, ROTARY BASES, TELESCOPIC BOOM CRANES, PUMPING UNITS, WINCHES, TANDEMS, HEAVY DUTY OR INDUSTRIAL EQUIPMENT, ETC.

- ◆ OTHER TYPES OF EQUIPMENT: ROTATIONAL PLANETARY, PROPULSION PLANETARY, TRANSFER BOX, PTO, DIFFERENTIAL WITH SERVICE BRAKES OR 'DIFFERENTIAL-LOCKS', HYDRAULIC OR HYDROSTATIC SYSTEM, POWER STEERING AND ALL TYPES OF HEAVY DUTY OR INDUSTRIAL EQUIPMENT HAVING A COMPONENT OR A SYSTEM WITH FRICTION DISCS IN OIL 'WET CLUTCHES'.
THE ZP-600 IS COMPATIBLE WITH ALL OILS

ZP-600 AUTOMATIC TRANSMISSION TREATMENT ADDITIVE AT A GLANCE:

- ◆ Provides smooth shifts without hesitation
- ◆ Saves fuel
- ◆ Eliminates gaps and slips at shifts
- ◆ Maintains the flexibility of seals
- ◆ Increase in the load capacity of the system
- ◆ Lowers the operating temperature
- ◆ Reduces breakdown and repairs
- ◆ Reduces oil oxidation
- ◆ Extends the service life of transmission oil
- ◆ Extends the service life of the transmission

- ◆ Our products are free of: solvents, silicone, PTFE (Teflon® by DuPont), alcohol, lead, graphite, sulfate, soap, kerosene, alkyl nitrate
